Written by Microsoft's own consulting team, this is the premier example-driven book for developing Office-based applications using SharePoint and .NET. It takes a practical problem/solution approach to common business challenges. You'll not only encounter interesting code samples, but also see how to combine these examples with the Microsoft collaboration platform's services. The book's solutions focus on using Visual Studio Tools for Office to build

the user interface layer. In addition, solutions can interact with SharePoint as a service provider, taking advantage of SharePoint's many collaboration features.

Is e-learning at your organization chronically underfunded? Discover how you can create workplace solutions with minimal budget in e-Learning Solutions on a Shoestring. Author Jane Bozarth, recognized as e-Learning Centre's October 2005 Pick of the Month, provides the nuts-and-bolts information you need to incorporate e-learning solutions at minimal cost. She offers myriad strategies for building from-scratch programs, recycling, reusing, and repurposing resources; negotiating reasonable expenses for "store bought" e-learning products; and incorporating real-world ideas for assembling tools, techniques, and strategies into workplace solutions.

Creating Cool PowerPoint? 97 Presentations

This book takes a practical problem-solution approach to common business challenges. You'll not only encounter interesting code samples, but also see how to combine these examples with the Microsoft collaboration platform's services. The book's solutions focus on using Visual Studio 2008 and its built-in Office development tools to construct the user interface layer. And solutions can interact with SharePoint as a service provider, taking advantage of SharePoint's many collaboration features like document repositories, collaboration sites, and search functions. This book is unique because it starts with challenges that end users deal with every day when using the Microsoft collaboration platform to support business processes. The solutions are presented as hypothetical business challenges of a fictional company. By presenting the examples in this context, author Ed Hild makes it easier to relate to the challenges and solution value. The goal of these examples is to build applications that apply the benefits of the Office desktop interface to the richness of SharePoint collaboration features. This book will help you develop real-world solutions to complex business problems and challenges.

E-Learning for Geographers: Online Materials, Resources, and Repositories

Presentation tools such as PowerPoint were initially created to simulate physical slides and have inherited

a lot of their limitations. In this dissertation we identify the shortcomings and unmet user needs in presentation software by means of literature study, observations, a survey and the programmatic analysis of over 12000 PowerPoint documents. The results indicate that user needs are slowly evolving while existing software has hardly changed over the last 30 years. We motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well-integrated solutions for the identified shortcomings. The resulting MindXpres platform consists of a new conceptual framework, content model, information system and presentation engine. We present MindXpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented in the existing tools. We further demonstrate the flexibility of the MindXpres platform by discussing a wide range of proof-of-concept plug-in solutions for the identified shortcomings and unmet user needs.

problem solving tools and techniques to help you tackle your toughest business dilemmas effectively. You will learn how to:

- Overcome any business challenge with robust logic and structure
- How to break down problems and make your workload lighter
- Deliver the 'killer' recommendations
- Discover how to successfully implement change in people and organisations
- How to keep yourself, your team, and your stakeholders happy
- How to use an effective hypothesis-driven approach to problem solving

Using case studies, a 'best practice example' and at least one figurative table or figure, every dilemma is brought to life equipping you with the very best tools to confront any problem your business may face. 'The most successful businesses don't avoid problems - they solve them. This practical, insightful and entertaining book guides you through how to do this. An indispensable resource for any manager.' Richard Newton, Business consultant and best-selling author

----- 'One of the key attributes in running a business successfully is the ability to see a situation in perspective. Too often the real issues go unrecognised, signs are misread, an opportunity slips by, the wrong problem is addressed. Only in retrospect is it obvious what should have been done. It is not easy, but the tools and techniques covered in Key Business Solutions should help.'
